DEEPAN SIVAKUMAR

DevOps Engineer

deepanvelu3@gmail.com (+91) 7010911863 linkedin.com/in/deepan-sivakumar

PROFILE

Cloud & DevOps Engineer with **3+ years of experience** designing, automating, and optimizing cloud infrastructure across **AWS and Azure**. Skilled in building scalable Kubernetes environments, orchestrating CI/CD pipelines, and automating operations through Bash scripting. Hands-on experience managing **20+ servers**, **10 Kubernetes clusters**, and deploying **20+ microservices** across on-prem and cloud platforms. Proven ability to deliver **60% operational time savings**, **30% cost optimization**, and drive secure, reliable deployments using modern DevSecOps tooling.

PROFESSIONAL EXPERIENCE

IMPIGER TECHNOLOGIES PVT LTD, *ENGINEER* 01/2023 – Present

- Managed **20+ Linux/Windows servers** and **10 Kubernetes clusters** across on-prem, AWS, and Azure environments supporting mid-scale production workloads.
- Built and managed **50+ CI/CD pipelines**, and developed **20+ pipelines end-to-end**, enabling **daily deployments** across multiple environments.
- Automated **40+ recurring operational tasks** using Bash scripting, reducing manual workload by **60%** and improving deployment consistency.
- Delivered **30% cloud cost reduction** by optimizing AWS ECS workloads, right-sizing EC2 instances, and implementing efficient logging/monitoring pipelines.
- Containerized and deployed **20+ microservices** using Docker, ECS Fargate, Kubernetes (RKE & AKS), and Helm charts.
- Integrated DevSecOps tooling into CI/CD workflows for **30+ applications** using SonarQube, ZAP, Trivy, Grype, and OWASP Dependency Check.
- Built AWS infrastructure including **VPCs, subnets, ALB, WAF, Security Groups, API Gateway**, and RDS/Aurora for highly available app deployments.
- Deployed applications built in **.NET, Java Spring Boot, Python Django, Node.js, and Angular**, using Nginx, Apache2, and HAProxy with high availability setup.
- Managed MySQL, PostgreSQL, MongoDB, and MinIO ensuring scalability, backups, and secure configuration.
- Implemented ELK stack for API analytics and centralized logging across Kubernetes clusters and microservices.

IMPIGER TECHNOLOGIES PVT LTD, *TRAINEE ENGINEER* 08/2022 – 12/2022

- Configured and deployed Linux & Windows servers using VMware, VirtualBox, Proxmox, AWS, and Azure.
- Set up and maintained cloud resources including **AWS VPC, IAM, EC2**, and **Azure VMs**.
- Monitored network and system performance; resolved incidents and optimized server configurations.
- Automated infrastructure tasks with Bash scripts integrated with email notifications.
- Performed routine maintenance, troubleshooting, and configuration management for on-prem infra.

SKILLS & ABILITIES

Cloud
AWS (ECS, EC2, VPC, ALB, WAF, RDS/Aurora, API Gateway), Azure (VMs, AKS, Fileshare, Storage, IAM)

CI/CD
Jenkins, AWS CodePipeline, Azure DevOps

Monitoring & Logging
ELK Stack, CloudWatch

Web Servers & Proxies
Nginx, Apache2, HAProxy

Version Control
Git, GitHub, Bitbucket

Containers & Orchestration
Docker, Docker-Compose, Kubernetes (RKE, AKS), Helm

Automation & IaC
Bash (40+ automation scripts), Terraform, Ansible

DevSecOps
SonarQube, OWASP Dependency Check, Trivy, Grype, ZAP

Databases & Storage
MySQL, PostgreSQL, MongoDB, MinIO

KEY PROJECTS

Automated RKE Kubernetes Cluster Provisioning (Ansible + ELK + 10 Microservices)
- Used **Ansible** to provision **2+ RKE clusters** including worker/master node setup, networking, and security configurations.
- Deployed the **ELK stack with Beats** for centralized logging and analytics.
- Deployed **10+ microservices** using Kubernetes manifests and Helm charts.

Azure AKS Deployment of Microservices (Helm + Azure File Share)
- Deployed **5+ microservices** in Azure AKS using Helm charts.
- Integrated **Azure File Share as NFS mounts** for persistent storage.
- Optimized AKS scaling and deployment reliability.

AWS ECS Fargate Microservices Deployment (VPC + ALB + WAF + API Gateway)
- Deployed **10+ microservices** using ECS Fargate and designed secure networking using **VPC, Subnets, Route Tables**.
- Implemented **Application Load Balancer + WAF** and exposed APIs via **API Gateway**.
- Managed EC2 instances for complementary workloads and logging.

CERTIFICATES

- Microsoft Certified: Azure Administrator Associate

EDUCATION

KAMADHENU ARTS AND SCIENCE COLLEGE, 06/2019 – 05/2022
B. COM COMPUTER APPLICATION
